Home Medication Summary App & Document
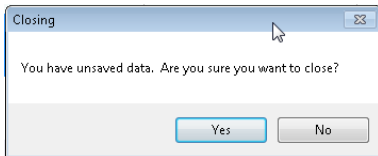

App Use
See the "Orders Reconciliation Part 6" Camtasia video on the intranet or reference wrench for app usage.
App Tips
- The Home Medication Summary App is accessed by opening the Home Medication Summary structured note in BAR.
- Best practice is to leave the app documentation until the patient's med administration has been completed for the visit.
- The app and document should always be kept in sync (save the app, save the document).
- The document may not be edited.
    - To preview, utilize document preview.
    - For changes, the document must be saved as incomplete and then reopened to re-launch the app.
- Any changes required to the medication column must be completed by modifying the discharge reconciliation.
- The printed medication list must NEVER be written on. To **modify a completed Home Medication Summary**:
    - Cancel the document
    - Open a new document
    - For reconciliation changes, identify and update the highlighted medications in the app
    - For doucmentation changes, update the existing documentation
    - Save the app
   - Save the document

App Warnings

The document will not update if you have not saved the app data. To save your information:
- Select No
- Save the app
- Save the document

You have new meds that need to be addressed:

Someone has added or changed a medication since the app was last opened for the patient.

To save your information:
- Select OK
- Click on & modify any highlighted medications
- Save the app
- Save the document

Correcting documentation errors:
