# Inpatient Medical Rehabilitation Unit

Blessing Hospital operates an 18-bed acute, inpatient medical rehabilitation unit in Quincy, IL. The unit is nationally accredited by CARF and the commission on accreditation of rehabilitation facilities.

The goal of the rehabilitation unit is to maximize the functional independence of the person served by restoring or compensating for physical and/or cognitive impairment in order to promote re-entry into the community.

An experienced and highly skilled interdisciplinary team of therapists and nurses collaborate with the person served to develop and carry out the treatment plan. Many staff members have specialty certifications including Certified Rehabilitation Registered Nurse® and Certified Brain Injury Specialist. This skilled team has experience working with many types of impairments resulting from spinal cord injuries, brain injuries, amputations, arthritis, stroke, fractures, multiple trauma, neuromuscular disease, and other orthopedic/neurological diagnoses.

Our rehab unit physiatrist, John DeGuzman, MD, is a specialist in Physical Medicine and Rehabilitation. The director of Rehabilitation is Karen Kerns, M.S., CCC-SLP, MBA.

As one of our “customers,” the Rehabilitation Services team wishes to present you with this report on our services and most recent outcomes as compared with regional and national averages.
